## EU REGULATION N. 547/2012

- Pumps with a minimum efficiency index  $MEI \geq 0.40$  in conformity with the EU Regulation in force from 1st January 2015.
- The bench mark for the most efficient water pumps is  $MEI \geq 0.70$ .
- The efficiency of a pump with a trimmed impeller is usually lower than that of a pump with a full diameter impeller. The trimming of the impeller adapts the pump to a fixed duty point, resulting in a lower energy consumption. The minimum efficiency index (MEI) is based on the full diameter impeller.
- The functioning of the water pump with variable places of operation can be more efficient and economical if, for example, it is controlled by means of a variable speed motor which adjusts the function of the pump to the system.
- The information regarding the bench mark efficiency is available at:  
[www.europump.org/efficiencycharts](http://www.europump.org/efficiencycharts)

Clean water

Domestic use

### PERFORMANCE RANGE

- Flow rate up to **50 l/min** (3.0 m<sup>3</sup>/h)
- Head up to **70 m**

### APPLICATION LIMITS

- Manometric suction lift up to **8 m**
- Liquid temperature between **-10 °C** and **+60 °C**
- Ambient temperature up to **+40 °C** (**+45 °C** for IP 05)
- Max. working pressure:
  - **6 bar** for IP 05, IP 07
  - **7 bar** for IP 800, IP1000
- Continuous service **S1**

### CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1  
IEC 60335-1  
CEI 61-150

EN 60034-1  
IEC 60034-1  
CEI 2-3

### CHARACTERISTIC CURVES AND PERFORMANCE DATA

50 Hz | n=2900 min<sup>-1</sup> | HS=0 m

MODEL		POWER (P <sub>2</sub> )		Q	Flow rate																					
Single-phase	Three-phase	kW	HP		m <sup>3</sup> /h	0	0.3	0.6	0.9	1.2	1.5	1.8	2.1	2.4	3.0	l/min	0	5	10	15	20	25	30	35	40	50

IP 1000M	IP 1000	0.75	1		70	66	61	56	51	46	41	36.5	31	22												

Q = Flow rate  
H = Total manometric head  
HS = Suction height

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made.

Because of their reliability and the fact that they are easy to use and are economical, they are ideal for domestic use and in particular for distributing water in combination with small pressure tanks and for the irrigation of gardens and orchards.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Cast iron with an Epoxy Electro Coating treatment, with threaded ports in compliance with ISO 228/1
<b>IMPELLER</b>	Brass with peripheral radial vanes
<b>MOTOR SHAFT</b>	Stainless steel EN 10088-3 - 1.4104
<b>MECHANICAL SEAL</b>	Ceramic - Graphite - NBR
<b>ELECTRIC MOTOR</b>	The three-phase pumps are fitted with high performance motors up to P2=0.55kW in class IE2 and from P2=0.60kW in class IE3 (IEC 60034-30)

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made.

Because of their compactness, reliability and the fact that they are easy to use, they are suitable for use in domestic applications such as the distribution of water in combination with small pressure tanks, for the irrigation of gardens and orchards, for drawing water from tanks and for all those other situations where air or gas may be present in the water to be pumped.

The pump comes complete with a flap-check valve. The pump should be installed in an enclosed environment or sheltered from inclement weather.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Cast iron with an Epoxy Electro Coating treatment, with threaded ports in compliance with ISO 228/1 and a built-in flap-check valve in the suction port
<b>IMPELLER</b>	Brass with peripheral radial vanes
<b>MOTOR SHAFT</b>	Stainless steel EN 10088-3 - 1.4104
<b>MECHANICAL SEAL</b>	Ceramic - Graphite - NBR
<b>ELECTRIC MOTOR</b>	The three-phase pumps are fitted with high performance motors in class IE2 (IEC 60034-30)

## INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made.

The hydraulic characteristics of these pumps, coupled with their compactness, makes them suitable for use in both domestic and industrial applications.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

## CONSTRUCTION CHARACTERISTICS

**PUMP BODY** Cast iron with an Epoxy Electro Coating treatment, with threaded ports in compliance with ISO 228/1

**IMPELLER** Brass with peripheral radial vanes

## INSTALLATION AND USE

Suitable for use in civil and agricultural applications.

The high efficiency and continuous duty capabilities makes these pumps ideal for use in applications such as flood and spray irrigation, drawing water from lakes, rivers and wells, or for any number of different industrial applications where the characteristics of high flow rates and mid to low head are required.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Cast iron complete with threaded ports in compliance with ISO 228/1

Q = Flow rate  
 H = Total manometric head  
 HS = Suction height

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The high performance and adaptability to a wide range of applications make them the ideal choice in domestic, civil and industrial applications, in particular for the distribution of water in combination with pressure tanks for boosting pressure in the network and for firefighting sets. The pump should be installed in an enclosed environment or sheltered from inclement weather.

## SELF-PRIMING "JET" PUMPS

Clean water
 Domestic use
 Civil use

### PERFORMANCE RANGE

- Flow rate up to **70 l/min** (4.2 m<sup>3</sup>/h)
- Head up to **60 m**

### APPLICATION LIMITS

- Manometric suction lift up to **9 m** (HS)
- Liquid temperature between **-10 °C** and **+40 °C**
- Ambient temperature up to **+40 °C**
- Max. working pressure **6 bar**
- Continuous service **S1**

### CONSTRUCTION AND SAFETY STANDARDS

**EN 60335-1**  
**IEC 60335-1**  
**CEI 61-150**

**EN 60034-1**  
**IEC 60034-1**  
**CEI 2-3**

## CHARACTERISTIC CURVES AND PERFORMANCE DATA

50 Hz | n = 2900 min<sup>-1</sup> | HS = 0 m

MODEL		POWER (P <sub>2</sub> )		Q	Flow rate

Q = Flow rate  
 H = Total manometric head  
 HS = Suction height

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The self-priming **JET SS** pumps are designed to pump water even in cases where air is present. As a result of their reliability and the fact that they are easy to use, they are recommended for use in domestic applications such as the distribution of water in combination with small or medium sized pressure tanks, and for the irrigation of gardens and orchards, etc.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Stainless steel AISI 304 complete with threaded ports in compliance with ISO 228/1
<b>IMPELLER</b>	Stainless steel AISI 304
<b>MOTOR SHAFT</b>	Stainless steel EN 10088-3 - 1.4104
<b>MECHANICAL SEAL</b>	Ceramic - Graphite - NBR
<b>ELECTRIC MOTOR</b>	The three-phase pumps are fitted with high performance motors in class IE3 (IEC 60034-30)

## 4" MONOBLOCK SUBMERSIBLE PUMPS

-  Clean water
-  Domestic use
-  Civil use
-  Agricultural use

### PERFORMANCE RANGE

- Flow rate up to **150 l/min** (9 m<sup>3</sup>/h)
- Head up to **128 m**

### APPLICATION LIMITS

- Maximum liquid temperature **+35 °C**
- Maximum sand content **150 g/m<sup>3</sup>**
- Maximum immersion depth of **60 m** with a sufficiently long power cable
- Vertical and horizontal installation
- Starts/hour: **20** at regular intervals
- Continuous service **S1**

### CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1  
IEC 60335-1  
CEI 61-150

EN 60034-1  
IEC 60034-1  
CEI 2-3

### INSTALLATION AND USE

Suitable for pumping clean water from boreholes that contain sand (up to 150 g/m<sup>3</sup>). Because of their high efficiency and reliability they are suitable for use in domestic applications such as domestic water supply as part of a pressure supply and for irrigation, etc.

### CONSTRUCTION CHARACTERISTICS

<b>DELIVERY BODY AND EXTERNAL SLEEVE</b>	Stainless steel AISI 304 complete with threaded delivery port in compliance with ISO 228/1.

## 4" SUBMERSIBLE PUMPS

-  Clean water  
(Maximum sand content 150 g/m<sup>3</sup>)
-  Domestic use
-  Civil use

### PERFORMANCE RANGE

- Flow rate up to **340 l/min** (20.4 m<sup>3</sup>/h)
- Head up to **405 m**

### APPLICATION LIMITS

- Maximum liquid temperature **+35 °C**
- Maximum sand content **150 g/m<sup>3</sup>**
- **100 m** immersion limit
- Installation:
  - vertical
  - horizontal, with the following limits:
    - 1SP4 - 1.5SP4 - 2SP4 - 4SP4 up to **27 stages**
    - 6SP4 - 8SP4 up to **17 stages**
    - 10SP4 - 12SP4 - 15SP4 up to **12 stages**
- Starts/hour: **20** at regular intervals
- Minimum flow rate for motor cooling **8 cm/s**
- Continuous service **S1**

### INSTALLATION AND USE

Suitable for use with clean water with a sand content of no more than 150 g/m<sup>3</sup>. Because of their high efficiency and reliability, they are suitable for use in domestic, civil and industrial applications such as for the distribution of water in combination with pressure tanks, for irrigation, for washing plants and for pressure boosting in fire-fighting sets, etc..

### CONSTRUCTION AND SAFETY STANDARDS

- Single-phase 230 V - 50 Hz
- Three-phase 400 V - 50 Hz

The single-phase versions supplied with a capacitor included in the packaging.

# PERFORMANCE RANGE

50 Hz |  $n = 2900 \text{ min}^{-1}$

Clean water

Domestic use

Civil use

### PERFORMANCE RANGE

- Flow rate up to **120 l/min** (7.2 m<sup>3</sup>/h)
- Head up to **42 m**

### APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Suction down to **22 mm** above ground level
- Continuous service **S1**

### CONSTRUCTION AND SAFETY STANDARDS

The pumps is complete with:

- power cable
- float switch
- hose connector Ø 35 mm
- complete connector with flap-check valve

EN 60335-1  
IEC 60335-1  
CEI 61-150

Q = Flow rate  
H = Total manometric head

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

PLURI pumps are recommended for pumping clean water and liquids that are not chemically aggressive for the materials from which the pump is made.

Because of their high efficiency and reliability they are suitable for use in applications such as domestic water supply from reservoirs, tanks or relatively deep wells, for drawing rain water from cisterns to water gardens or for use in irrigation systems, etc.

## INSTALLATION AND USE

PLURI TECH pumps are recommended for pumping clean water and liquids that are not chemically aggressive for the materials from which the pump is made.

Because of their high efficiency and reliability they are suitable for use in applications such as domestic water supply from reservoirs, tanks or relatively deep wells, for drawing rain water from cisterns to water gardens or for use in irrigation systems, etc.

An internal electronic device starts or stops the pump automatically when the tap is opened or closed.

### CONSTRUCTION CHARACTERISTICS

<b>POWER CABLE</b>	H07 RN-F type 10 m long power cable with Schuko plug

### ELECTRONIC DEVICE

PLURI TECH pumps are fitted with an internal electronic device which starts the pump when the pressure of the system falls below 1.5 bar (eg. when opening a tap) and stops it when the flow falls below 3 litre per minute.

It protects the pump:

- against dry running;
- against blockage: after long periods of pump inactivity the electronic device starts the pump every 48 hours for 10 seconds

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

The SPEED series is suitable for use with clear water that does not contain abrasive particles.

Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable.

They are suitable for use in applications such as draining small flooded areas (rooms, cellars, garages) in the event of an emergency, for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.

## INSTALLATION AND USE

The F1 series pumps are suitable for use with clear water that does not contain abrasive particles.

Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable.

They are suitable for use in fixed installations and applications such as draining small flooded areas (rooms, cellars, garages) in the event of an emergency, for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.

## CONSTRUCTION CHARACTERISTICS

Domestic use

Civil use

### PERFORMANCE RANGE

- Flow rate up to **180 l/min** (10.8 m<sup>3</sup>/h)
- Head up to **9 m**

### APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+50 °C** (Maximum liquid temperature +90 °C for a maximum of 3 minutes intermittent service)
- Passage of solids up to **Ø 20 mm**
- Suction level **25 mm** above ground level
- Continuous service **S1**

### CONSTRUCTION AND SAFETY STANDARDS

The pumps are complete with:

- power cable
- float switch for single-phase versions

**EN 60335-1**  
**IEC 60335-1**  
**CEI 61-150**

**EN 60034-1**

## INSTALLATION AND USE

The F1 VORTEX series pumps are suitable for use with dirty water. The design solutions that have been adopted, such as the complete cooling of the motor, guarantee the reliability of the pump. They are suitable for use in domestic applications such as for discharging dirty water containing suspended solids.

## INSTALLATION AND USE

Designed for draining clear or slightly dirty water, the SECURITY series pumps are recommended for domestic, civil and professional applications for draining flooded interiors such as basements and garages, for emptying swimming pools and tanks, for disposal of waste water which is not filthy.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

## INSTALLATION AND USE

The RANGER-ST submersible pumps in stainless steel are recommended for draining filthy water in domestic, civil and industrial applications, in every case where there are solid bodies in suspension, for example water mixed with mud, groundwater, surface water. They are suitable for draining flooded areas such as cellars, underground car parks, car washes, for emptying cesspools and for sewage disposal. These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

## INSTALLATION AND USE

RANGER MC ST submersible pumps in stainless steel are recommended for draining dirty and filthy water in domestic, civil and industrial applications. They come equipped with a DOUBLE-CHANNEL impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm. They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached houses.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

## INSTALLATION AND USE

RANGER pumps are recommended for domestic, civil and industrial applications in all cases where the water contains suspended solids up to Ø 50 mm, for example groundwater, surface water, filthy and dirty water.

They are for example suitable for draining flooded areas such as cellars, underground car parks, car washes, for emptying cesspools and for sewage disposal.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.

# RANGER MC

## SUBMERSIBLE PUMPS

### DOUBLE-CHANNEL

-  Filthy water
-  Domestic use
-  Civil use
-  Industrial use

### PERFORMANCE RANGE

- Flow rate up to **750 l/min** (45 m<sup>3</sup>/h)
- Head up to **15 m**

### APPLICATION LIMITS

- **5 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of suspended solids up to **Ø 50 mm**
- Minimum immersion depth for continuous service: **300 mm**

### CONSTRUCTION AND SAFETY STANDARDS

The pumps are complete with:

- power cable
- float switch for single-phase versions

EN 60335-1  
IEC 60335-1  
CEI 61-150

EN 60034-1

## INSTALLATION AND USE

RANGER MC submersible pumps are suitable for draining dirty and filthy water in domestic and civil applications. They come equipped with a DOUBLE-CHANNEL stainless steel impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm.

They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached houses.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

## CONSTRUCTION CHARACTERISTICS

# PATROL

## SUBMERSIBLE PUMPS

### DOUBLE-CHANNEL

-  Filthy water
-  Domestic use
-  Civil use
-  Industrial use

### PERFORMANCE RANGE

- Flow rate up to **1600 l/min** (96 m<sup>3</sup>/h)
- Head up to **25 m**

### APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of solids:
  - up to **Ø 50 mm** for PATROL /50
  - up to **Ø 70 mm** for PATROL /70
- Minimum immersion depth for continuous service:
  - **390 mm** for PATROL /50
  - **430 mm** for PATROL /70

### CONSTRUCTION AND SAFETY STANDARDS

- Power cable
- External float switch and control box for single-phase versions

**EN 60335-1**  
**IEC 60335-1**  
**CEI 61-150**

**EN 60034-1**  
**IEC 60034-1**  
**CEI 2-3**

Q = Flow rate  
H = Total manometric head

Tolerance of characteristic curves in compliance with EN ISO 9906 Grade 3B.

## INSTALLATION AND USE

PATROL series pumps, made from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a DOUBLE-CHANNEL impeller and are capable of pumping liquids containing short fibred suspended solids. They are ideal for pumping sewage, waste water, water mixed with mud, groundwater and surface water in locations such as blocks of flats, public buildings, factories, multi-storey and underground car parks, washing areas, etc.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Cast iron with threaded port in compliance with ISO 228/1
<b>IMPELLER</b>	Precision cast stainless steel AISI 304 DOUBLE-CHANNEL type
<b>MOTOR SHAFT</b>	Stainless steel AISI 431
<b>TWO MECHANICAL SEALS SEPARATED BY AN OIL CHAMBER</b>	<b>Motor side:</b> Ceramic - Graphite - NBR <b>Pump side:</b> Silicon carbide - Silicon carbide - NBR
<b>POWER CABLE</b>	H07 RN-F type 10 m long power cable

## INSTALLATION AND USE

The TRC series of grinder pumps manufactured from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a GRINDER in tempered stainless steel of great resistance which completely grinds up solid bodies and fibres in waste and reflux water from domestic and civil applications and conveys it under pressure into the sewers through small diameter pipes.

## CONSTRUCTION CHARACTERISTICS

<b>PUMP BODY</b>	Cast iron with an Epoxy Electro Coating treatment, with threaded port in compliance with ISO 228/1	
<b>IMPELLER</b>	Technopolymer open type	
<b>GRINDER</b>	Tempered AISI 440C stainless steel

# S.O.S.

## EMERGENCY KIT FOR EMPTYING OR PREVENTING FLOODS

🏠 Domestic use

S.O.S. is the indispensable and practical emergency kit for tackling flooding in garages, cellars and basements with efficacy and speed.

Thanks to the versatile drainage pump and the 15 metres long PVC hose it is possible to swiftly drain the flooded area, if necessary using the plastic crate as a filter.

With S.O.S. you can completely drain the area affected by flooding: the pump can in fact suck up water down to a level of only 2 mm from the bottom.

With S.O.S. you have everything you require ready for use:

- pump with a ready-fitted connector, a 10 metres long power cable with Schuko plug and an external float switch;
- PVC hose with a rapid connector;
- Crate-filter to prevent possible bulky residues blocking water drainage.

### TYPICAL USE

In the case of flooded premises place S.O.S. on the floor, attach the flat hose to the pump by means of the rapid connector, plug into the electricity network and empty the water through the hose. The plastic crate will act as a filter, making it possible to drain down to a level of about 2 cm from the bottom.

In order to drain the residual water disconnect the pump from the crate and place it on the floor. The pump will be able to drain down to a level of only 2 mm from the bottom.

S.O.S. also has the advantage that it can be stored on a shelf so as to have everything necessary in order and ready for use.

## COMPONENTS

### SUBMERSIBLE SPEED MOP PUMP

- Single-phase **230 V - 50 Hz**
- Thermal overload protector incorporated in the winding
- **10 metres** power cable fitted with Schuko plug
- External float switch
- **"CAMLOCK"** rapid connection
- Performance:
  - **H max= 9 m**
  - **Q max= 160 l/min**
- Emptying level down to **2 mm** from the bottom

### PVC HOSE

- **"CAMLOCK"** rapid connection
- Length of tube **15 m**
- Diameter of tube **1 1/4"**

### CRATE-FILTER

- Complete with a system for fixing the pump for a stable operation and an easy detachment for use of the pump without the crate-filter
- Complete with a lid so as to put away S.O.S. in order and have it always ready for use

## DIMENSIONS AND WEIGHTS

TYPE	DIMENSIONS mm			kg*

### PRESSURE LOSSES

### MAXIMUM DELIVERY HEIGHT

- 2.2 bar version ● = 18 m
- 1.5 bar version ● = 11 m
- 0.8 bar version ● = 5 m

### DIMENSIONS AND WEIGHT

### PERFORMANCE RANGE

- Max flow rate: **200 l/min** (12 m<sup>3</sup>/h)
- Working pressure: **10 bar**
- Restarting pressure: **1.5 bar** ●

### APPLICATION LIMITS

- Maximum liquid temperature **+65 °C**
- Ambient temperature up to **+40 °C**
- Burst pressure **> 40 bar**
- Protection: **IP 65**
- Power: – **0.75 kW (1 HP)** TALENTO-1  
– **1.5 kW (2 HP)** TALENTO-2
- Voltage: **230 V**
- Frequency: **50/60 Hz**
- Max current: – **10 A** TALENTO-1  
– **16 A** TALENTO-2
- Flow rate: **12 m<sup>3</sup>/h**

### CONSTRUCTION AND SAFETY STANDARDS

- Resinated and easily replaced electronic card for complete protection from humidity, fitted in the case with an IP 65 protection.
- The electronic card inside TALENTO has undergone the strictest EMC tests of electromagnetic compatibility.

### INSTALLATION AND USE

The TALENTO series consists of electronic devices designed to start (when a tap is turned on) and stop (when a tap is turned off) single-phase pumps.

A microprocessor protects the pump from dry running, and allows the pump to be restarted either automatically or manually. It also prevents the pump from starting too often when small leaks are present within an installation.

### OPTIONS AVAILABLE ON REQUEST

- TALENTO-1 version with restarting pressure **0.8 bar** ●
- TALENTO-2 version with restarting pressure **2.2 bar** ●
- Version with 1" NPT
- Version with cable and Schuko plug and socket
- Version with pressure gauge

### STARTING PRESSURE

There are three different models available, each with a different starting pressure and easily identified by the coloured cap positioned at the rear of the TALENTO, for installations requiring delivery at various heights.

### ACCESSORIES

# TALENTO SMALL

## ELECTRONIC PRESSURE REGULATORS

↑ Domestic use

### PERFORMANCE RANGE

- Max flow rate: **200 l/min** (12 m<sup>3</sup>/h)
- Working pressure: **10 bar**
- Restarting pressure: **1.5 bar**

### APPLICATION LIMITS

- Maximum liquid temperature **+50 °C**
- Ambient temperature up to **+40 °C**
- Burst pressure **40 bar**
- Protection: **IP 65**
- Power: – **0.75 kW (1 HP)** TALENTO SMALL-1  
– **1.5 kW (2 HP)** TALENTO SMALL-2
- Voltage: **230 V**
- Frequency: **50/60 Hz**
- Max current: – **12 A** TALENTO SMALL-1  
– **16 A** TALENTO SMALL-2

### STANDARD INSTALLATION

In order to avoid frequent restarts we advise installing a small accumulation tank (ES-05).

### CONSTRUCTION AND SAFETY STANDARDS

- Tropicalised resinated and easily replaced electronic card for complete protection from humidity, fitted in the case with an IP 65 protection.
- The electronic card inside the TALENTO SMALL has undergone the strictest EMC tests of electromagnetic compatibility (low emission of interference and a high immunity to disturbance) as a guarantee of its reliable use everywhere.

### INSTALLATION AND USE

Flow and pressure sensing device for control and protection of single-phase pumps up to 2 HP (for domestic applications). It starts the pump when there is a drop in system pressure (e.g. when opening a tap) and stops the pump when the flow drops below 2 l/min (tap closed).

### OPTIONS AVAILABLE ON REQUEST

- Version with pressure gauge

### ACCESSORIES

- **ES-05** Stainless steel 0.5 litre tank (1")
- **GSR** Special three piece joint with an o-ring seal (1" M)

### DIMENSIONS AND WEIGHT

Weight: 0.7 kg
